

XP Image Resizer

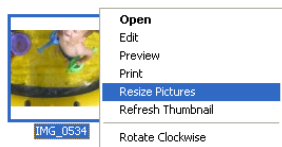

1) Download the application from <http://bit.ly/xpimageresizer> and follow the installation directions.

2) Open a folder of images and highlight the ones you'd like to convert.

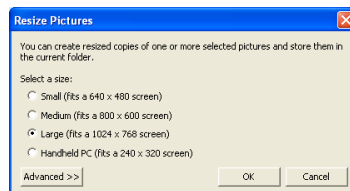

- You can select multiple files by holding the 'Ctrl' key and clicking on each file
- Example below:

3) Right-click one of the images highlighted in blue and select "Resize Pictures"

4) For the Gallery, select "Large" in the Resize Menu, and click "OK"

5) Each of the files you selected will have a copy created with the letters "(Large)" added to them. Upload these converted files to Gallery.
